ABHISHEK KUMAR SINGH

Software Developer | ReactJS | NextJS | Micro-Frontend Architecture | NodeJS
Kolkata, India | linkedin.com/in/abhishek-kumar-singh-a0a306169

PROFESSIONAL SUMMARY

Results-driven Software Developer with 4+ years of experience engineering scalable web applications for product teams. Specialized in ReactJS, NextJS, and TypeScript with hands-on experience architecting Micro-Frontend systems and Monorepo setups. Proven ability to lead frontend initiatives, establish engineering best practices, and deliver impactful user-facing products.

TECHNICAL SKILLS

Core: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks: ReactJS, NextJS 14+, Redux Toolkit, Tailwind CSS, Material UI, Ant Design

Architecture: Micro-Frontend (Module Federation), Monorepo (Nx, Turborepo), Component-Driven Design

Tools & APIs: Git, GitHub Actions, Postman, JIRA, Socket.IO, Highcharts, Stripe, REST APIs

WORK EXPERIENCE

Software Developer — NextZen Minds *Oct 2025 – Present | Kolkata, India*

- Architected an **Nx Monorepo** unifying shared component libraries, utility hooks, and ESLint/Prettier configs across multiple applications, reducing code duplication by ~40%.
- Configured **Turborepo with pnpm workspaces** to manage tasks across multiple apps, speeding up builds through smart caching.
- Leading frontend development in **Next.js 14 (App Router)** with Tailwind CSS, achieving sub-2s Largest Contentful Paint (LCP); established Git branching strategy, PR templates, and code review standards adopted team-wide.

Frontend Developer — NextZen Minds *Jun 2024 – Oct 2025 | Kolkata, India*

- Built a **Micro-Frontend system using Webpack 5 Module Federation**, enabling independent deployment of product modules with zero inter-team dependencies.
- Built a reusable React component library shared across 3 product modules (-30% dev time) and integrated REST APIs with React Query for client-side caching.

Program Analyst — CBNITS *Aug 2023 – May 2024 | Kolkata, India*

- Built data-rich analytics dashboards using Highcharts and Redux Toolkit for real-time data monitoring.
- Guided junior engineers on component architecture and code quality while working directly with clients to gather requirements, delivering the hospital management module on time.

Junior Programmer — CBNITS *Jul 2022 – Jul 2023 | Kolkata, India*

- Developed a real-time messaging feature using Socket.IO integrated with Node.js backend services.
- Contributed to multiple frontend modules across Agile teams and automated business workflows using SAP iRPA (Intelligent Robotic Process Automation).

PRODUCT PROJECTS

Swift Security — Cloud Security SaaS *Stack: ReactJS, Redux Toolkit, Ant Design, Module Federation*

- Built real-time protection policy modules with role-based access control (RBAC) UI and independently deployable Micro-Frontend architecture for a multi-tenant SaaS platform.

MoneyMax — Pawnbroking Platform (Singapore) *Stack: ReactJS, NextJS, Node.js, REST APIs, Weighing-Scale & Barcode Scanner Integration*

- Built a pledge-lending platform for MoneyMax, a Singapore-based pawnbroking finance partner, enabling loans against gold, silver, and valuables with barcode-tagged pledge tracking, integrating weighing-scale and barcode-scanner hardware for real-time item valuation.

Bidscout — Procurement & Vendor Management *Stack: ReactJS, Ant Design, REST APIs*

- Delivered Certificate Management and Vendor Registration modules with role-based security and third-party API integrations for buyer contact syncing.

ConnectBud — EdTech Gamified Learning *Stack: ReactJS, Material UI, Socket.IO, Stripe*

- Built real-time interactive classroom sessions using Socket.IO with a modular, rapidly iterable React component architecture.

eZHealth — Healthcare Platform *Stack: ReactJS, NextJS, Material UI, Stripe*

- Developed teleconsultation, COVID-19, and wellness modules with Next.js server-side rendering (SSR) for improved SEO and load performance.

EDUCATION

B.Tech, Electronics & Communication Engineering — MCKV Institute of Engineering, Kolkata *2018 – 2022 | CGPA: 8.3*
